Announcement on the update of introduction article of  
Interprotein in the “Bio Venture Directory” published by  
Japan Bioindustry Association (JBA)

We are pleased to announce that the introduction article of Interprotein in the “Bio Venture Directory” published by Japan Bioindustry Association (JBA) has been updated on August 26<sup>th</sup>, 2019

(<https://area34.smp.ne.jp/area/card/5697/7ggObk/M?S=mbnal9lfn9k>).

This article includes proposals of collaborative researches based on Interprotein’s proprietary platform technologies, INTENDD (*in silico* screening strategy for selection of small molecule hit candidates), AI-guided INTENDD (activity prediction system for enhancement of lead generation/optimization of small molecules) and helix-loop-helix peptide (therapeutic peptide with conformationally-constrained structure) as well as Interprotein’s in-house projects such as small molecule inhibitors for TNF- $\alpha$ , IL-6 and Runx1, and helix-loop-helix peptide inhibitors for TIM-3, NKG2A and C99 (Amyloid  $\beta$  precursor).
